HOLOGRAPHIC SOUND

## INTRODUCING THE TSUYOSHI YAMAMOTO TRIO'S "A SHADE OF BLUE" LISTENING SESSION AT LINKWITZ.AUDIO

LINKWITZ.audio invites you to experience "A Shade of Blue," the latest release on record label evosound by the **Tsuyoshi Yamamoto Trio**. Since his stunning debut in 1974, Japanese pianist **Tsuyoshi Yamamoto** has built a career that spans four decades.

Come join us at this listening session to understand more about this legendary jazz musician and hear some of his most well-known renditions, such as "Misty" and "The Way We Were," in high-fidelity audio.

This event will be hosted by **Chris Connaker** from **Audiophile Style** and **LINKWITZ.audio**.

The record will be presented on the flagship **LINKWITZ LX521.4MG reference loudspeaker**. An unconventional **4-way full-range dipole transducer**. The **LX521.4MG** has been designed for the most "uncanny" recreation of the original recording venue, presenting a lifelike and natural soundstage illusion.

If there are any questions about this event, please get in touch with us at [info@evomg.com](mailto:info@evomg.com).
